Spill kits for Specific Neutralisation Applications

Vytac ACX Acid Neutraliser quickly and effectively neutralises acid spills. With some concentrated acids e.g. hydrofluorosilic, phosphoric and sulphuric acids water should be added before neutralisation. A permanent pink colour indicates complete neutralisation.

Vytac CS Alkali Neutraliser neutralises liquid caustic spills. Strong alkalis should be diluted with water before neutralisation. A yellow colour indicates complete neutralisation.

WHEELED BIN SPILL KITS

Spill kits contain a range of products to deal effectively and quickly with spills.

Refills Available Add R to code below (eg M-120-WBR)

Maintenance (M): For indoor use to contain and absorb non aggressive liquids and chemicals whether oil or water based.

Oil Selective (O): For all external uses where oil needs to be absorbed without saturating the absorbent with water. Highly absorbent of oils and fuels and repellent of water.

Universal Chemical (U): For use with aggressive chemicals.

BATTERY ACID SPILL KIT

Forklift charging stations or power pack back up rooms using lead acid batteries are vulnerable to spilled battery acid. A heavy duty battery contains 30 litres of acid. The Battery Acid spill kit provides for 32 litre absorbent capacity and provides for:

- 1 containment of the spill
- 2 neutralisation of the battery acid
- 3 cleanup of the residue for disposal of the safe and environmentally benign residue.

DRAIN PROTECTION

First Course of Action in Containing Spills

Storm drains connect directly to controlled waters. Spilt liquids escaping into these drains may result in pollution of the controlled waters. Immediate steps must be taken to prevent entry into the drainage system. The Fosse range of Drain Protection Devices provide a quick and effective method of defending drains.

Reusable Drain Covers

Code	Dimensions	Pack Quantity	Pack kg
